RE: Excellent Service

To Whom it May Concern,

We have worked with Jason Goodgame and the Goodgame Company since we started operations in Pell City. In fact, Jason is our longest running service provider/vendor and has been a significant part of our success to date.

Some of the services they provide has been in the area of site selection, building design and expansion, facilities upgrades, general construction, etc. Goodgame Company is the original contractor assigned to design and build our manufacturing plant and has continued in various other capacities as well. The Goodgame Company has a wide array of services and capabilities that would be beneficial for any project.

In today's ever changing business climate, it's great to have partners that operate at a high level of excellence and integrity. The Goodgame Company is one of those valued partners. If you're looking for an excellent building/construction and overall facilities service provider, I would highly recommend the Goodgame Company. They have been and will continue to be our "go-to" partner in the future.

Sincerely,

A handwritten signature in blue ink that reads 'Todd Green'.

Todd Green  
President
